

Addendum:

Response to Patterson View Claim - Updated Arborist Report 7-25-13

Cristina Woolrich, 411 Richardson Street, Sausalito, CA

- I merged two current photos that were taken from Carolyn's deck on the day of the meeting July, 31, 2013. This gives a more realistic view of the yard and shows the view at the height of it's annual growth. I do not see the obstructions mentioned in the arborist report page 14 and 15. Racoon Strait, Angel Island, Richardson Bay, San Francisco Bay, East Bay, Berkeley, Oakland, Alcatraz, etc, are visible on the horizon. View and light are clearly visible in spite of my landscaping.
- The Pittosporum hedge referenced on page 15 of the report that Carolyn claims is obstructing the Bay Bridge, Downtown San Francisco and Sausalito South Ridge belongs to the neighbor at 216 4th Street.
- Lori and Stan Hales still owned 218 4th Street in May of 2011. The photo merge in the arborists report has given me two of the neighbor to the left, two princess flower, 1 1/2 Jasmine, etc. and encompasses two of my other neighbors yards to the right. The arborists cut line is below historical growth of this yard. The photo taken by by Carolyn just 8 months after the sale of her house shows the jasmine, hopseed and seasonal trees above the cut line recommended to restore her view. This slide shows a comparison with the actual view on July 31, 2013.
- Please see a historical perspective of this view over 5 years of growth. Even at different times of year, our trees are kept at a responsible height based on their growth pattern. The bay and horizon views are unaffected.

These two merged photos were taken from Carolyn's deck on the day of the meeting July, 31, 2013. This gives a more realistic view of the yard and shows the view at the height of its annual growth. I do not see the obstructions mentioned below. Raccoon Strait, Angel Island, Richardson Bay, San Francisco, Bay East Bay, Berkeley, Oakland, Alcatraz, etc, are visible on the horizon. Light and landmark views are visible to 218 4th Street in spite of my yard, my princess flower, etc.

The Pittosporum hedge referenced on page 15 of the report that Carolyn claims is obstructing the Bay Bridge, Downtown San Francisco and Sausalito South Ridge belongs to the neighbor at 216 4th Street.

Existing, Seasonal or Potential Landmark View Obstructions:

Raccoon Strait is obstructed by T-1, T-2 and the vine.

Angel Island is obstructed by T-1, vine and T-3.

Richardson Bay is obstructed by T-1, vine and T-3.

San Francisco Bay is obstructed by T-1, T-3, T-4 and T-5.

East Bay city lights-Berkeley and Oakland are or will be obstructed by T-1, T-3, T-4 and T-5.

Port of Oakland is obstructed by T-5 and T-6.

East Bay hills is obstructed by the vine, T-1, T-3, T-4 and T-5.

Alcatraz Island is obstructed by T-5 and T-6.

Treasure Island is obstructed by T-5 and T-6.

Yerba Buena Island is obstructed by T-5 and T-6. □

Please see a historical perspective of this view over 5 years of growth. Even at different times of year, our trees are kept at a responsible height based on their growth pattern. The bay and horizon views are unaffected.

Hopseed Appear July 2012
Below roof line and window of brown house

ght should be below the roof lines and at a
ees could be trimmend back to the
and experience 3 or more feet of water
ason.

Lori and Stan Hales still owned 218 4th Street in May of 2011. The photo merge in the arborist report has given me two of the neighbor to the left, two princess flower, 1 1/2 Jasmine, etc. and encompasses two of my other neighbors yards to the right. The arborist cut line is below historical growth of this yard. The photo below to the left was taken by by Carolyn 8 months after the sale of her house. It shows the jasmine, hopseed, seasonal trees above the cut line recommended to "restore her view". The photo merge to the right is the actual view as seen on July 31, 2013.
