

# STAFF REPORT

## SAUSALITO CITY COUNCIL

---

### AGENDA TITLE:

Prioritization of projects as part of the FY 2009-10 Priority Calendar

### RECOMMENDED MOTION:

Move to approve the FY 2009-10 Council Priority Calendar

---

---

### SUMMARY

This report is the final step in the process to create the annual Council Priority Calendar. The goal of this process, is for the Council to clearly state their priority and to ensure there is effective workload planning.

On May 5, the Council reviewed all current projects and removed and/or added new projects based on Council consensus. The Council has now individually ranked all forty-nine (49) projects (attachment A). The Council will review the final tally and once a consensus is reached on the final rankings, the Council will identify where to draw the line for "below the line" projects.

Staff is requesting that the Council review the list of current and proposed projects and rank them in an effort to establish the 2009-10 priority calendar.

The proposed program is a three step process, as outlined below:

- On May 5, 2009, the City Council reviewed all current and proposed projects, asked for clarification, added new projects that were not listed and solicited input from the public. Council then voted to remove any current or new project(s) that was not a priority for consideration.
- On May 26, 2009, the Council will discuss and rank all the remaining and new projects. After the priorities have been tallied and ranked, the Council will identify where to draw the line for "below the line" projects.
- Council will review the rankings and approve the 2009-10 priority calendar.

### BACKGROUND

Staff recommended, as part of the 2008-09 budget process, that the City Council adopt a new administrative tool to prioritize projects that do not reflect routine provisions of

Item #: 6C  
Meeting Date: 5-26-09  
Page #: 1

City services. The goal of this process is for the Council to clearly state the priority for study, and to ensure there is effective workload planning. Last year, the City Council identified forty (40) Priority Calendar projects and ranked twenty-one (21) of those projects above the line. The City Council and Management Team held its six month Strategic Planning Session Retreat on April 10, 2009 and identified fifty-three (53) objectives, many of which do not reflect "routine" City services. Based on the discussions at the retreat, Staff is recommending that the City Council review the list of current and proposed projects and rank them in an effort to establish the 2009-10 priority calendar.

The definition used for the priority calendar items:

- Requires at least 40 hours of staff time
- Are one time in nature
- Have been directed by Council, City Manager or Commission through specific action, including the budget
- Do not reflect the routine provisions of City Services
- Are mandates imposed by state or federal government, or other funding agencies
- Are major capital improvements

To insure the system captured all issues, a "below the line" category of projects was created. These are items that are not expected to be started within the next year. These items are not acted on, but are kept on the master list for the next annual review by the Council. This ranking process goes hand in hand with the City Budget process.

One of the purposes of the Priority Calendar is to ensure Council and staff are on the same page with regard to the scope of a project and what it takes to complete it to Council's satisfaction (including timeframe). Thus, it is important that every project is reviewed by Council.

## ISSUES

**Next Steps:** The Council will individually rank each project 1 – 49 or No Ranking (NR) for each of the proposed projects. Please note that 1 is low and 49 is high. The highest number value will result as the highest priority and the lowest number total will identify the lowest priority. Staff will total the rankings and provide the proposed priorities based on the total points. The Council then will discuss and confirm the final ranking including determining what items fall "below the line".

## FISCAL IMPACT

There is no direct fiscal impact to this report. Individual projects have a cost estimate associated with them, which will be incorporated into the budget as feasible.
