

Occupation: Small Business Owner

As a 25 year Sausalito resident and small business owner, I am invested in sustaining the fragile balance among residential, commercial and waterfront activities as we weather this economic downturn. I will apply over 30 years experience in advising financial institutions and government agencies in efficiency, good management and budgeting practices to the issues facing Sausalito.

Economic health is possible without waterfront development projects that displace our Marinship maritime services and artists or downtown redevelopment that compromises Sausalito's charm and quality of life.

All critical decisions by the Council – particularly those involving taxpayer dollars or Sausalito's historic character - should be fully transparent to the extent legally possible. I led the petition urging this Council to release Closed Session votes withheld from the public.

I will represent the interests of residents; many have worked for years to make Sausalito what it is today. Let's fix our streets and sewers, manage our bicycle traffic, and promote a family friendly, eco-sensitive environment.
